

The precise tolerances of aerospace work call for a unique set of pneumatic tools.

DESOUTTER PISTOL GRIP DRILLS

Desoutter Pistol Grip Pneumatic Drills are ideal for all general industrial drilling tasks. Best ergonomic shape, single and double handed use. Has a drilling capacity up to ½" (13mm) Ø steel.

DOTCO RIGHT ANGLE DRILLS

Dotco Right Angle Drills are available with light duty or heavy duty low profile heads. These aerospace quality angle drills are standard equipped with rear exhaust and feature a lock-off safety throttle to prevent accidental activation.

AIR HAMMERS

Ingersoll Rand air hammers are time-tested performers for industrial riveting, hammering and cutting applications. They are designed so you can let the tool do the work.

RIVET GUNS

These heavy duty pneumatic riveters are designed for aerospace applications. Our pistol grip style rivet guns are equipped with .401 or .498 shanks and can handle rivets ranging from 1/8" to 5/16" depending on the material.

CLECO RIGHT ANGLE NUTRUNNERS

The Cleco shut off angle nutrunner is designed for applications where high levels of accuracy and repeatability are required. Any Cleco air nutrunner features the Clecomatic clutch which shuts off the tool as soon as the desired torque has been reached.

PULSE TOOLS

The Cleco H Series PTH Hydraulic Pulse Nutrunners with pistol grip has a torque range from 3 to 88.8 ft. lbs. (4 to 120 Nm) with the ability to handle bolt sizes from #10 to 1/2" (M5 - M12).
