Power, durability, and speed are just a few of the fundamentals that surround the automotive industry. Shouldn't the assembly tools be powerful, durable, and quick?

International Air can provide you with an accurate shut-off assembly tool with a wide torque range for various applications.

PULSE TOOLS

The Cleco H Series PTH Hydraulic Pulse Nutrunners with pistol grip has a torque range from 3 to 88.8 ft. lbs. (4 to 120 Nm) with the ability to handle bolt sizes from #10 to 1/2" (M5 - M12). They are equipped with inertia shut off, external torque and speed adjustments, and has industry leading repeatability.

MAINTENANCE DUTY IMPACT DRILLS

Ingersoll Rand Vehicle Service Grade Tools are designed for work in automotive and heavy equipment maintenance. Choose these tools if you will only be using the impact gun intermittently as opposed to on an all day, production basis.

PNEUMATIC DRILLS

International Air Tool offers a wide variety of pneumatic drills, including pistol grip, inline, and right angle drills, for your industrial production or maintenance needs.

TORQUE NUTRUNNERS

The Cleco shut off angle nutrunner is designed for applications where high levels of accuracy and repeatability are required. Any Cleco air nutrunner features the Clecomatic clutch which shuts off the tool as soon as the desired torque has been reached.
