Warranty

Cleco® and Cleco Dotco™ are registered trademarks of Apex Brands Inc. Apex Brands, Inc. warrants products and parts sold by it, insofar as they are of its own manufacture, against defects of material and workmanship, under normal use and service in accordance with its written instructions, recommendations, and ratings for installation, operation, maintenance, and service of products, for a period of **ONE YEAR FROM THE DATE OF INITIAL USE, BUT IN NO EVENT SHALL THE WARRANTY EXCEED 24 MONTHS FROM DATE OF DELIVERY TO DISTRIBUTOR.**

Proof of Purchase with shipment date must be furnished by the user to validate the warranty. This warranty applies only to products manufactured by Apex Brands, LLC and specifically excludes products manufactured by others.

Products not manufactured by Apex Brands, LLC are warranted only to the extent and in the manner warranted to Apex Brands, LLC by the manufacturer and then only to the extent Apex Brands, LLC is

able to enforce such warranty. Apex Brands, LLC's warranty with respect to products manufactured by it is limited to the repair or replacement, as Apex Brands, LLC may elect, of any defective part regarding which the Distributor has given 5 days written notice from the discovery of such defect. Installation and transportation costs are not included.

Apex Brands, LLC shall have the option of requiring the return to it of the defective material, transportation prepaid, for inspection. No allowance will be made for repairs without Apex Brands, LLC's approval.

APEX BRANDS, LLC MAKES NO OTHER WARRANTY OF ANY KIND WHATSOEVER, EXPRESSED OR IMPLIED, AND HEREBY DISCLAIMS ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

Lubrication

Proper lubrication is essential to the economical operation of pneumatic and electric tools. Apex Brands, LLC products perform better and their life is extended by using the recommended lubricants. All lubricants that are listed in the accessory section of this catalog have undergone extensive testing and are recommended for use with Apex Brands, LLC products.

Safe Work Practices

WARNING

The signal word "WARNING" indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injury; and, identifies safe work practices in this operating instruction. Observe these notes and proceed with special care in these cases. Pass all safety instructions on to other users. In addition to these instructions, the general local safety and accident prevention rules must be observed.

⚠ WARNING

These Safety Instructions are not intended to be all inclusive. The operator should also read and understand the Product Manual for the specific tool.

⚠ WARNING

Before mounting any abrasive wheel, buffing wheel, wire brush, saw blade, flap wheel or other product, after all tool repairs and whenever a tool is issued for use, the rpm should be checked with a tachometer to insure that its actual speed does not exceed rated speed. Governed tools in use on the job should be checked at least once every twenty hours of use, or once weekly, whichever is more frequent. Tachometers must be checked and calibrated on a regular basis according to the manufacturer's recommendations.

⚠ WARNING

Test and operate tools at 90 PSIG (620 kPa/6.2 bar) maximum pressure (measured at the tool while the tool is running) unless tool is marked otherwise. Use air line filters – regulators – lubricators.

Always remove the air supply hose before working on the tool or changing accessories.

⚠ WARNING

Immediately shut off the tool if unusual sound or vibration is detected. Remove and inspect the wheel and check the tool speed (RPM).

Use of over-speeding grinder or unbalanced wheels may result in serious injury.

⚠ WARNING

Each type of wheel, wire brush, saw blade, flap wheel, and other product, has specific mounting procedures and regulations concerning spindles, flanges, blotters, collets, etc., which should be used. Wheels must mount on tool's spindle freely but not loosely. Spindle nuts must be tightened so as not to crack the wheel with too much force. Nuts must have all thread engagement.

⚠ WARNING

Regularly inspect all wheels, etc., and discard cracked, chipped, or otherwise damaged units.

⚠ WARNING

Select proper guards for the application and mount securely and properly. Always mount guards so that abrasive debris, sparks, etc., are deflected away from the operator.

Safety guards should be in good condition. Any guard which has been subjected to a wheel failure should be discarded and replaced.

⚠ WARNING

Speed rating of abrasive wheel, buffing wheel, wire brush, saw blade, flap wheel, or other products used, must equal or exceed speed rating of tool.

Exceeding the speed of accessories may cause failure of these products and serious operator injury.

Wheels must clearly show the rated speed for its use, or must be discarded and not used.

⚠ WARNING

Wear impact resistant goggles or face shield at all times the tool is in operation. Other protective clothing should be worn, if necessary, for spark protection deflection.

⚠ WARNING

High sound levels can cause permanent hearing loss. Use hearing protection as required by the work environment and grinding application.

⚠ WARNING

Employ a safety program to provide inspection and maintenance of all phases of tool operation and air supply equipment in accordance with "Safety Code for Portable Air Tools," CAGI B186.1 and CAGI B7.1.

Make sure that all repairs are by trained personnel only and that these safety instructions are understood by the user.

⚠ WARNING

When mounting any grinding wheel, the tool should be run at operating speed with the safety guard in place, in a protected area such as under a work bench, for at least one minute. A damaged wheel should fail within that time.

Any suspect wheel of unknown origin should not be used and must be properly disposed.

Cleco® Dotco™

Tools that work with operators, not against them.

Performance

Known for their durability, dependability, and versatility, the Cleco Dotco brand is viewed as the premier line of material removal tools in the industrial marketplace. This is made possible by sound design and manufacturing techniques, producing tools that are small, comfortable and lightweight, yet can withstand the most rugged environments.

Ergonomics

Cleco Dotco tools are designed so their form follows their function. Simply, tools that are more comfortable for the operator to use...tools that work with operators and not against them...including composite housings, low vibration, and low noise.

Versatility

By using only a few motor types, a diverse line of Cleco Dotco products have been developed to handle a wide range of applications. These tools also have a high interchangeability of parts making maintenance easier and more affordable.

Cleco® Dotco™ Quality

Quality Cleco Dotco power tools have been manufactured for over 75 years. Understandably, we are proud of our tools. Proud that they have become the industry standard.

ISO 9001 Certified

Our manufacturing processes are ISO 9001 certified... that means our products are manufactured to the highest standards.

Low Noise, Low Vibration

Noise and vibration of power tools in manufacturing is an important issue. Cleco Dotco tools have been designed to operate as quietly as possible, while providing substantial power. Vibration has been kept to a minimum by using precision parts and high quality bearings.

Precision Parts

It's simple, precision parts let operators manufacture precision products. Whether it is a spindle, a chuck, a motor or an angle head, our parts are manufactured from the finest materials available and are machined to the highest tolerances.

Parts Interchangeability

Maintenance of tools can be time consuming...and expensive. That is why our products have been designed with high parts interchangeability. With fewer parts required to repair our tools, less inventory of parts is required and tools are easier to repair.

PERFORMANCE, VERSATILITY & QUALITY

When it comes to fine finishing applications such as die grinding or de-burring, no tools are better suited for the job than Cleco® Dotco™ grinders. Dotco's reputation for durability, dependability and versatility is among the highest for fine finishing applications. This is the result of years of continuous improvements in engineering design and manufacturing processes.

Dotco grinders are designed with the operator in mind. They are small, lightweight and comfortable to use, without sacrificing durability. Plus, they incorporate elastomer coatings, and perfectly balanced moving parts to keep vibration to a minimum. This optimal combination of tool characteristics allows the operator to focus doing the best job possible, in the least amount of time.

TOUGH TOOLS FOR TOUGH JOBS

Cleco grinders meet the demanding requirements of industries including shipbuilding, pipe fabricating, transportation equipment manufacturing, and welding applications. Since these types of applications typically require a high material removal rate, Cleco grinders incorporate high horsepower/high RPM motors.

To achieve maximum durability, Cleco grinders use top quality precision components and motor assemblies protected by all metal housings.

Precision Grinders, Carbide Bur and Mounted Wheel Grinders

Used in finishing applications that require a high degree of durability.

Cone and Plug Wheels

Used for general purpose grinding work on mild steel, stainless steel, metal alloys, and cast steel. Applications include:

Grinding and smoothing
fillets, corners

Mild bending contours

Beveling workpiece edges
prior to welding

General grinding in confined areas

Internal grinding

Type 1 Wheels

Used on portable horizontal shaft tools.

Applications Include:

Notch free grinding

Pre-weld cleaning

Smoothing out weld seams

Grinding concrete or
masonry products

Removing seam lines
from castings

Type 1 Cut-Off Wheels

Applications include cutting carbon and stainless steel, ferrous metals, and cast iron

Type 6 & 11 Cup Wheels

Used on right angle or vertical shaft tools.

Type 6 – Straight Cup Wheels

Type 11 – Flared Cup Wheels

Type 27/28 Depressed Center Wheels

Type 27 wheels are used at an angle to the workpiece between 30° and 45°.

These wheels do not "flat grind."

Type 28 wheels are saucer shaped wheels, which are contoured to provide a correct "built-in" grinding angle. Consequently, Type 28 wheels may be used for flat contact on the workpiece.

10-90 Series - Turbine

100,000 RPM 0.06 hp (0.044 kW)

Requires no air line lubrication - High precision ball bearings for long life expectancy
Two-stage turbine motor with roll throttle
Achieves a superb finish with its high speed and precision spindle
Light weight and durable aluminum housing
Low vibration and quiet operation minimizes operator fatigue

Cat. No.	Collet Size	Free Speed (rpm)	Abrasive Capacity	Type Housing	Weight	Length	Air Inlet Size

MP Series - MP4200 & MP4201

70,000 RPM 0.06 hp (0.044 kW)

Ideal for precision deburring, blending, and smoothing applications
Lightweight, ergonomically designed and vibration free
Rear exhaust directs air away from work
Standard with 5 ft air hose and 1 ft overhose
Ideal for tight spots
Slim comfortable design with ergonomic grip for operator comfort
Double bearings for increased durability on MP4200 inline
Includes both 1/8 in and 3 mm collets

12-26 Series - Multiple Extension

18,000 RPM 0.9 hp (0.67 kW)

Can be customized with multiple extensions for access to the most far-reaching areas
Multiple industrial bearings provides optimal balance and power transfer
Designed to work comfortably with the operator
Available with 300 series 1/4" collet and 3/8-24" external thread

POWER & PERFORMANCE

Cleco® Dotco™ Sanders, Buffers, and Polishers are available in a variety of styles and power ratings to provide flexibility in choosing the best tool for the job. Disc sanding and polishing, wire brushes, buffing wheels, abrasive sheets, woven or non-woven belts. No matter the application, Cleco Dotco has a quality tool solution.

Cleco Dotco belt sanders can grind corners, enter grooves, debur, strap polish or enter channels. The unique belt cover makes belt changes quick and easy. You can use non-woven nylon or coated abrasive belts on a variety of surfaces.

FLEXIBILITY WHEN YOU NEED IT MOST

The unique sanding attachment pivots 360 degrees to allow user flexibility in reaching confined areas. The belt cover snaps on/off easily with no special tools needed allowing for quick belt changes. The arm itself is interchangeable to best suit a variety of applications.

CONFIGURED FOR YOUR ENVIRONMENT & APPLICATION

Cleco MP Series Drills are Industrial grade medium duty drills suitable for a wide range of production and MRO applications. Cleco® Dotco™ pneumatic drills are Industrial high duty grade and are used daily in applications ranging from appliances to aerospace manufacturing. Offered in a variety of configurations, including pistol grip, inline, and right angle, Dotco air drills are designed for the high-volume, high-repetition, high-precision demands of today's assembly lines. Whether a spindle, chuck, motor or angle head, our interchangeable parts allow operators the versatility they need for a range of industrial and manufacturing applications.

PARTS INTERCHANGEABILITY

Maintenance of tools can be time consuming and expensive. That is why our products have been designed with high parts interchangeability. With fewer parts required to repair our tools, less inventory of parts is required and tools are easier to repair.

PRECISION PARTS

It's simple, precision parts let operators manufacture precision products. Whether it is a spindle, a chuck, a motor or an angle head, our parts are manufactured from the finest materials available and are machined to the highest tolerances.

ULTIMATE ERGONOMICS

Dotco drills have long been the industry workhorse for the high-volume, high-repetition, high-precision demands of today's assembly line. Dotco drills are the ergonomic solution to deliver comfort and productivity, while assuring decreased operator fatigue, potential for injury and downtime on the line.

Design features double ball bearings for the spindle, pre-loaded for longer bearing life and more accurate spindle control. Vibration and runout are reduced.

Gears are machined from alloy steel and heat-treated, with fixed cages to control centers for smooth operation.

Time-proven motor and gear design is well-balanced to reduce vibration and extend tool life.

Each tool is individually checked, aligned and adjusted on our assembly line for minimum chuck runout. Vibration is minimized.

Ergonomically critical finger and thumb guides fit the hand and aid in control.

The trigger is practically forceless requiring only 4 ounces of pressure to engage.

Full feathering is accomplished with our pressurized tip-valve design for speed control while drilling.

Housing is made of durable lightweight industrial grade aluminum.

Finger lip under the trigger keeps other fingers from interfering with the trigger action.

Rubber grip acts as a thermal protector and isolates vibration for improved operator comfort.

Handles are shaped to fit the human hand. They are flat where they need to be flat and round where they need to be round ensuring less slippage.

Minimal noise levels enhance operator comfort.

Microstop Cages

A wide range of Microstop Cages are available for use with Cleco® Dotco™ Pistol Grip Drills.
Use for Drilling, Reaming and Countersinking.
Cutters are also available for a complete system solution.

These cages have:

- High precision, body in heat-treated chrome steel, fully ground throughout
- Microstop depth adjustment options for .0005 or 0.001 in adjustment
- Microstop depth setting is held securely in place by locknut with seal.
- This patented feature allows an easy loosening of the locknut without damage to the drill cage.

Wide range of Basic Drill cages with varying strokes and metric/inch cutter interface

- For each there are different mounting bases available to suit the needs of the application
- Reduced dimensions for tight access areas.
- Vacuum options to reduce clean up/prevent operator exposure to dust and chips.

TOUGH TOOLS EASY CHOICE.

From light assembly to maximum torque requirements Cleco® has the impact wrench you demand.

MP SERIES

FAST, COMPACT, POWERFUL

Cleco MP Series Impacts are Industrial grade medium duty tools suitable for a wide range of production and MRO applications.

CV SERIES

HIGH TORQUE, LOW WEIGHT, UNBEATABLE VALUE

The CV Series is a practical and rugged workhorse for general industrial production, repair, and maintenance. Lightweight, balanced and comfortable, the CV Series impacts deliver Cleco performance at an unbeatable value.

CWC SERIES

THE ULTIMATE BALANCE OF PERFORMANCE, DURABILITY, AND ERGONOMICS

The CWC Series combines powerful performance, durability, and a user-preferred ergonomic design in one lightweight comfortable package. A reliable triple cycle heat treated twin hammer mechanism and industrial grade bearings ensure that the CWC Series impacts deliver long-lasting productivity.

CWM SERIES

ENGINEERED FOR HEAVY-DUTY APPLICATIONS IN DEMANDING ENVIRONMENTS

The CWM Series is built to thrive in the toughest environments. With hundreds of hours spent on advanced engineering and testing, this tool has been dropped from two stories, bashed on concrete and tested outside in extreme environments to make sure it performs whenever and wherever you need it.

W SERIES

DESIGNED FOR PUNISHING INDUSTRIAL APPLICATIONS, EASY SERVICE, AND REDUCED DOWNTIME

The W Series is the most powerful, longest lasting, low maintenance impact series we offer. It has a proven history for durability, holding up to the critical demands of heavy industry. Engineered to reduce downtime this series is a staple in the oil and gas, rail, and shipping industries.

MP Series

10,000 RPM

- High power to weight ratio
- 4-speed regulator for variable torque control
- All metal housing increase tool life and reduces vibration*
- Overmold grip for user comfort and removable belt clip*
- 100% ball bearing construction
- Excellent choice for soft joint applications

BEST-IN-CLASS PERFORMANCE

The Clecomatic® clutch delivers **Best-in-Class Accuracy** exceeding a Cm of 2.0 with a tolerance of +/- 10%.

Built-in the USA and factory tested to guarantee a high level of torque accuracy and repeatability.

The Clecomatic® clutch has an **Industry Leading 5-Year Guaranteed!**

The latest design provides up to a **19% Weight Reduction**, improving balance and reducing user fatigue, with no loss of durability.

*Completely re-engineered **Clecomatic®** clutch delivers **best-in-class accuracy**, exceeding a Cm of 2.0 with a tolerance of $\pm 10\%$.*

*New design and advanced materials yield up to **19% weight reduction** based on configuration, at no loss of balance or durability.*

Adjustable reverse lever is located near the trigger to offer **true one-hand operation** and adaptability for left-or-right-handed users.

Easy-to-access torque verification port is parallel to the main air line for streamlined air management.

Two interchangeable grip sizes adapt to the widest range of hands and provide increased flexibility and reduced operating cost.

Soft-touch grip is integrated into the newly designed handle to deliver superior protection against temperature, chemicals, vibration, and slippage. For the operator, this means **improved ergonomics and reduced fatigue**.

12-40 Series - Inline Router

18,000 RPM 1.7 hp (1.27 kW)

Maximum power for larger routing application
Tremendous power for the toughest portable routing operations
Unique governor design assures minimum air consumption,
maximum power at correct speed and long motor life
All models oil free

Router Guides

For use on Dotco 12-10, 12-20, 12-20, 12-25 and 12-40 series.

The minimum router bit length (Overall Length) to be used is determined by the formula:
 $OAL = 1-13/16" + C + P$ (series 12-10);
 $OAL = 2" + C + P$ (series 12-20 & 12-25). "C" is the "C" dimension of the router guide and "P" is the desired protrusion of the router bit.

Important: Insert bit into collet as far as possible, then pull out 1/16" and tighten collet.

In an emergency, if it is necessary to pull out the bit more than 1/4", be sure to insert a short length of blank shank (not to exceed 5/8" long) in the bottom of the collet before inserting the bit.

Cleco® Production Tools provide solutions to challenges, leveraging technology for accuracy, connectivity, productivity and safety.

Cleco Production Tools covers a wide range of industrial markets, including aerospace, automotive, foundries, furniture, general industry, metal fabrication, petroleum, power generation, shipbuilding, and transportation. We offer our customers solutions and products that meets their demanding productivity requirements.

Corded Electric Assembly Tools

The Cleco® NeoTek™ fastening system is the next generation of smart tool solutions. NeoTek exceeds the industry's most demanding assembly requirements by combining over 50 years of experience with smart technology. The NeoTek 30 and 50 series tools have angle heads that were engineered to provide **1 million cycles maintenance-free**, while delivering **class-leading repeatability** of 2.0 Cm/ CmK at +/- 7%.

Cordless Tools

Experience the freedom and flexibility of cordless tools with real-time wireless error-proofing.

NeoTek LiveWire is Cleco's exclusive cordless tool system, an industry-leading innovation that combines traditional fastening technology with advanced Wi-Fi connectivity. LiveWire tools:

- Include advanced features such as digital process controls, onboard electronic intelligence and an integrated barcode scanner
- Provide up to 1700 rundowns on a single battery charge transmit safety critical data securely, thanks to a 2.4/5Ghz encrypted wireless network

Because There's A Lot On The Line.

APEX® is a market leader in fastening tools such as bits, sockets, wrenches, and torque products that are engineered for the toughest industrial application. APEX's expertise comprises more than 80 years of experience and the commitment to serve its customers in the automotive, aerospace, energy, electronics, and general industries with a wide range of quality and long-life fastening solutions built to enhance productivity and with end-user safety in mind. APEX's fastening solutions can be customized to meet specific application needs and are available to customers worldwide.

Strong, Powerful Tools That Are Up to the challenge.

The Aerospace Industry requires and durability at high speeds. From fastening and material removal tools to sophisticated drilling equipment, Cleco's products are used in quality- and safety-critical applications around the world.
