Each production line requires its own unique set of pneumatic tools. Using the right tool for the right job leads to a safer workplace and higher productivity.

PULSE TOOLS

The Cleco H Series PTH Hydraulic Pulse Nutrunners with pistol grip has a torque range from 3 to 88.8 ft. lbs. (4 to 120 Nm) with the ability to handle bolt sizes from #10 to 1/2" (M5 - M12). They are equipped with inertia shut off, external torque and speed adjustments, and has industry leading repeatability.

MAINTENANCE DUTY IMPACT DRILLS

Ingersoll Rand Vehicle Service Grade Tools are designed for work in automotive and heavy equipment maintenance. Choose these tools if you will only be using the impact gun intermittently as opposed to on an all day, production basis.

CLECO PNEUMATIC SCREWDRIVERS

Cleco inline screwdrivers have long been regarded as the assembly tool standard against which all other brands are measured. Cleco screwdrivers provide users the ultimate in light and medium duty assembly tool performance. A wide variety of accessories provide the building blocks for tool configurations designed to meet the unique assembly application requirements of modern industry.

TORQUE NUTRUNNERS

The Cleco shut off angle nutrunner is designed for applications where high levels of accuracy and repeatability are required. Any Cleco air nutrunner features the Clecomatic clutch which shuts off the tool as soon as the desired torque has been reached. The Clecomatic clutch come standards with a 5 year warranty against defects in materials and workmanship.
