Some serial numbers **STARTING** in 2003 have a letter at the end of the serial number.

See chart above for business unit letter designations.

Serial number example: **LG|36|0937|P** LG = 2006, 36 = Week 36 (manufactured in week 36),
0937 = Item 937, P = manufactured by Plasma Products

¹Maxstar 150 models used the LD serial number prefix in 2003. Note: Style number replaces serial numbers on some models.

Liner Replacement Service and Instructions

Removing Existing Liner

Turn off power. Remove neck from gun assembly. Lay cable straight. Loosen liner retention set screw on the power pin. Grasp liner which protrudes from power pin and remove from cable assembly.

Install Replacement Liner

Insert liner into power pin with cable laying straight. Position the liner so that it extends approximately 1" (25.4 mm) beyond the gun handle. Tighten liner retention set screw to secure liner to cable assembly. Make sure cable is straight before trimming liner. Trim and deburr the front of the liner with 1/4" (6.4 mm) extending beyond the gun handle and reinstall neck. Trim and deburr the back end of the liner with 1/8" (3.2 mm) extending beyond the power pin.

Service

Inspect for excessive wear and debris on the inside diameter. Do not dip liner in solvents for cleaning. Liner may be periodically blown out with shop air. Replace with new liner when excessive wear or debris produces poor electrode feed.

DRIVE ROLLS

Base selection of drive rolls upon the following recommended usages:

1. V-Grooved rolls for hard wire.
2. U-Grooved rolls for soft and soft shelled cored wires.
3. U-Cogged rolls for extremely soft shelled wires.
4. V-Knurlled rolls for hard shelled cored wires.
5. Drive roll types may be mixed to suit particular requirement (example: V-Knurlled roll in combination with U-Grooved).

DRIVE ROLLS

Base selection of drive rolls upon the following recommended usages:

1. V-Grooved rolls for hard wire.
2. U-Grooved rolls for soft and soft shelled cored wires.
3. U-Cogged rolls for extremely soft shelled wires.
4. V-Knurled rolls for hard shelled cored wires.
5. Drive roll types may be mixed to suit particular requirement (example: V-Knurled roll in combination with U-Grooved).

Outfit for Disposable Tanks

23-1014 Includes 249-499B preset oxygen regulator, 249-500B preset propane regulator, cylinder holder, 11-1101C torch, #5 tip, 8ft (2.4m) hoses and instruction manual. Allows maximum portability and may be used in locations where larger pressurized cylinders are not allowed.

Kit shown in inset photo above may be used with disposable propylene or propane and oxygen cylinders (Cylinders not included).

*Disposable oxygen and fuel tanks may be purchased at most hardware locations.
May not be used with LP Multi-Flame (Rosebud) tip.*

23-1003B Includes 11-1101C torch, #3-7 tips, 30-15-520 acetylene regulator (for "B" 40 cubic foot tank), 30-20-540 oxygen regulator, reverse flow check valves, 8' (2.4m) covered hoses and instruction manual.

23-1003P Kit with regulator fitting for propane or larger industrial acetylene cylinders. Includes 11-1101C torch, #3-7 tips, 30-15-510 fuel regulator, 30-20-540 oxygen regulator, reverse flow check valves, 8' (2.4m) covered hoses and instruction manual.

23-1003 Kit with regulator fitting for acetylene (for "MC" tank) 10 cu. ft. cylinder. Includes 11-1101C torch, #3-7 tips, 30-15-200 fuel regulator, 30-20-540 oxygen regulator, check valves, 8' (2.4m) covered hoses and instruction manual.

OR

23-1001D Works with any fuel gas and oxygen. Includes 11-1101C torch, #3-7 curved tips, 8' (2.4m) hoses and instruction manual. Packaged in display box as shown ("B" hose connections fuel 9/16"-18-LH, Oxygen 9/16"-18-RH).

239-047B with BRITISH hose connections (Fuel G-3/8"-19 LH, Oxygen G 3/8"-19 RH). Tips included #3-7. Replacement British hose 8 ft. 13254-6-8.

239-048A with EUROPEAN hose connections (Fuel G-3/8"-19 LH, Oxygen G 1/4"-19 RH). Tips included #3-7. Replacement European hose 8 ft. 13254-7-8.

23-1013A with AUSTRALIAN hose connections (Fuel 5/8"-18-LH, Oxygen 5/8"-18 RH). Replacement Australian hose 8 ft. 13254-5-8.

Hoses may be connected to any standard oxy-fuel regulators (no adaptors required).

The Little Torch™ Service Parts/Consumables

Magnetic Torch Stand & Tip Organizer

14014 Solid metal stand comes with holes drilled and numbered for #2-7 tips. Just a twist of the wrist removes the torch from the magnet. Magnetic clip mounts easily on Little Torch™ body (torch and tips sold separately).

Stock No.	Gas	Capacity	Height-Diameter
0C20	Oxygen	20 cu.ft.	17 3/4" - 5 1/4"
2329E	"MC" Acetylene	10 cu.ft	14 1/2" - 4 1/8"
13558	Propane	5 lb.	12 1/2" - 8"

The Little Torch™ has unmatched flexibility - it can be used with several fuels including acetylene, hydrogen, propane, propylene, or natural gas. It produces a perfectly controlled, completely stable flame hot enough to melt commercially weldable metals, glass and even ceramics. It may also be used with special heating tips to melt up to 3 oz. of gold or silver. Excellent for soldering platinum.

It's the complete works in a handy self-contained lightweight unit. These highly portable kits come complete with everything you need for your soldering or brazing operations. Kits include tanks, regulators, safety check valves, five tips, torch and hoses all in a handy carrying case. Oxygen and acetylene cylinders can be refilled at most welding supply stores (disposable LP tanks are not included). Kits weight less than 32 lbs.

Propane Caddy

23-1015P Propane Caddy Includes 13558 (5 lb.) refillable propane tank, 0C20 (20 cu.ft.) oxygen tank, 11 1101C torch with 8 ft. (2.4m) covered hoses, #3-7 tips, 30-20-540 oxygen regulator, 30-15-510 propane regulator, H698 pair reverse flow check valves, 13787A powder coated metal carrier and complete operation and instruction manual.

Propane Caddy

23-1010P Propane Caddy Incudes 11-1101C torch, 8' (2.4m) covered hoses, #3-7 tips, 249-500 B preset propane regulator, 30-20-540 oxygen regulator, 0C20 oxygen cylinder (20 cu.ft.) 13493 caddy carrier, H698 pair check valves, and complete instruction manual. The 14.1 oz. disposable LP tank provides up to 15 hours of running time with #5 tip.

Disposable tanks not included.

Acetylene Caddy

23-1004A Acetylene Caddy Includes 11-1101C torch, #3-7 tips, 30-15-200 acetylene regulator, 30-20-540 oxygen regulator, H698 pair reverse flow check valves, 8' (2.4m) covered hoses, 0C20 (20 cu.ft.) oxygen cylinder, 2329E (10 cu. ft.) acetylene cylinder, 13493 caddy carrier and instruction manual.

Brazes solenoid and expansion valves so quickly that heat is unable to transfer to internal parts, protecting them from damage and eliminating the need for messy and costly heat sink materials.

Twin flame tips solder coil return bends quickly and evenly; concentrated heat will not heat and loosen surrounding joints.

Twin flame "C" style tips quickly braze reversing valves without burning internal components.

Revolutionary patented "C" style tips provide 100% flame wrap for fast, efficient, even heating. Heat is confined to the joint area protecting surroundings from burning. "C" style tips also assure even heat on the blind side of the braze joint.

Accumulators can be brazed extremely fast by simply laying the patented "C" style tip near the joint.

Soldering, Brazing, Sweating & Heating

NE835A

239-193

Acetylene-Air Handi-Heat®

Handi-Heat® soldering outfits provide fast heat with acetylene and atmospheric air. Concentrated soft flame delivers 4700 degrees F heat just where it is needed for maximum performance on all types of soldering, heating, thawing and other applications. Tough NE180A torch handle is built to last – machined from solid brass. Unlike plastic torches, it is not sensitive to temperature changes. Full length fluted handle provided firm comfortable grip. Needle valve provides excellent flame adjustment. Easy to operate. Just hold torch and set flame with one hand.

Silver Smith™

Designed for jewelers, silver smiths and hobbyists (excellent choice for light brazing and soldering). Air-fuel torches deliver the ultimate in quality and flame control. The all metal torch provides strength and long life, while precision jeweled orifice tips produce a soft, consistent flame. The Silver Smith™ torch system is designed to work with air and acetylene gas.

H195 Hard Hat

Hard Hat™ Regulator Guards

Protect regulators from costly gauge replacement with our Hard Hat gauge guards. Promotes safety - designed to help prevent broken gauges which can lead to gas leaks. Time and cost savings - helps prevent costly equipment down time and expensive repairs.

HB190 Hard Hat is made from rugged steel with a bright yellow, baked-enamel finish. Quickly and easily attaches to regulator. Fits Series 40™, HB1500 and HB2100 Series brass regulators.

H195 Hard Hat is formed from extremely tough, impact-resistant polycarbonate resin with a bright, safety-yellow finish. Fits Series 30™ and 1700 Series single-stage regulators.

Note: Will not work with flow gauge regulators.

GASAVER™

Save money, save time and improve safety.

Ideal for production brazing and welding applications, our GASAVER can help you realize huge savings by eliminating wasted gas during torch start-up/shut-down and between flame applications. Save time by eliminating repeated torch adjustment. GASAVER gives you a safe place to temporarily put your torch and is used by America's largest production plants. Torch flame is automatically extinguished when torch is not in use. Simply pass torch over pilot flame to re-light.

WDW100 is standard GASAVER for use with propylene gas and oxygen. Equipped with adjustable pilot light.

WDW101 is standard GASAVER for general use with acetylene and oxygen. Can be installed in any convenient location on the line between regulators and torch. The closer the torch, the greater the savings in oxygen and acetylene. Equipped with adjustable pilot light.

WDW103 is GASAVER equipped with separate adjustable pilot fuel inlet for use with low-pressure gas with injector type torches. Separate source of high-pressure pilot gas required. May also be used with hydrogen gas, however propane or natural gas is recommended to supply the adjustable pilot light.

WDW104 is standard GASAVER equipped with adjustable pilot light for use with propane or natural gas at 4 PSI or more.

For your added convenience, spot welder tongs and tips can now be ordered through the Miller Service Parts business for use with the following models:

- MSW-41, MSW-41T, MSW-42, MSW-42T, LMSW-52 and LMSW-52T

Gyro Bail 041979
Supports the weight of the welder. Operates with boom and counterweight or from spring-loaded cable. Spot welds in any position.

Important Ordering Information

- To determine the correct tong reorder length, measure exposed tong length when installed in spot welder.
Removed tongs measure 2 inches longer than the listed chart length. For correct reorder length, deduct 2 inches from the removed tong.
- One set of tips is supplied with each set of tongs.
- Maximum welding capabilities are obtained with minimum tong length.

For your added convenience, spot welder tongs and tips can now be ordered through the Miller Service Parts business for use with the following models:

- PSW-1020 ATT and PSW-2020 ATT
- SSW-1020 ATT, SSW-2020 ATT and SSW-2040 ATT

Important Ordering Information

- To determine the correct tong reorder length, measure from the center of the spot weld tip back to the front water hose connection.

- Tongs and tips shown to the left can be used with all PSW and SSW model spot welders. Recommended maximum tong length is 18 in (457 mm). A limited group of special tongs are available, contact Miller Service Parts.
- Tong throat-height dimension for standard 90° and 45° tongs is 4-1/4 in (108 mm). Throat length is measured from the center of the spot tips to the front water hose connection on the tong.
- One set of tips is supplied with each set of tongs.
- Tips are made of RWMA Class 2 alloy.
- Maximum welding capabilities are obtained with minimum tong length.
- MT = Morse Taper
No. 1 Morse Taper diameter = 1/2 inch
No. 2 Morse Taper diameter = 5/8 inch

ITW Dykem® Paint Markers

Dykem® Brite-Mark® is a general purpose permanent marker ideal for making clear, bold markings on almost any surface (i.e. metal, rubber, plastic, glass, concrete, leather, stone, wood, vinyl, and more). Its quick drying, oil-based paint withstands indoor and outdoor conditions without fading, chipping, or losing its opacity. Dykem Brite-Mark can be used to permanently identify inventory, assemblies, tools, finished products, or work-in-progress while resisting most work related abuses or compounds.

Part #	Tip	Description	Package Quantity
84001	Fiber/Bullet	12.0 cc Blue, Dykem® Brite-Mark®	12
84002	Fiber/Bullet	12.0 cc Black, Dykem® Brite-Mark®	12
84003	Fiber/Bullet	12.0 cc White, Dykem® Brite-Mark®	12
84004	Fiber/Bullet	12.0 cc Yellow, Dykem® Brite-Mark®	12
84005	Fiber/Bullet	12.0 cc Orange, Dykem® Brite-Mark®	12
84006	Fiber/Bullet	12.0 cc Red, Dykem® Brite-Mark®	12
84007	Fiber/Bullet	12.0 cc Green, Dykem® Brite-Mark®	12

Dykem® TexPen® is one of the most rugged markers you'll ever use. It can easily write through oil, grease, and even underwater. The Dykem TexPen features a stainless-steel ball tip so you'll never have to worry about the tip wearing out before the paint is gone, even if you're writing on rough concrete or rusty metal. The thick, bold paint markings withstand extreme weather conditions without losing legibility or brightness.

LIMITED WARRANTY — Subject to the terms and conditions below, Miller Electric Mfg. LLC, Appleton, Wisconsin, warrants to its original retail purchaser that new Miller equipment sold after the effective date of this limited warranty is free of defects in material and workmanship at the time it is shipped by Miller. **THIS WARRANTY IS EXPRESSLY IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING THE WARRANTIES OF MERCHANTABILITY AND FITNESS.**

Within the warranty periods listed below, Miller will repair or replace any warranted parts or components that fail due to such defects in material or workmanship. Miller must be notified in writing within thirty (30) days of such defect or failure, at which time Miller will provide instructions on the warranty claim procedures to be followed. If notification is submitted as an online warranty claim, the claim must include a detailed description of the fault and the troubleshooting steps taken to identify failed components and the cause of their failure.

Miller shall honor warranty claims on warranted equipment listed below in the event of such a failure within the warranty time periods. All warranty time periods start on the delivery date of the equipment to the original end-user purchaser, and not to exceed twelve months after the equipment is shipped to a North American distributor or eighteen months after the equipment is shipped to an International distributor.

Miller's True Blue Limited Warranty shall not apply to:

1. **Consumable components; such as contact tips, cutting nozzles, contactors, brushes, relays, work station table tops and welding curtains, or parts that fail due to normal wear. (Exception: brushes and relays are covered on all engine-driven products.)**
2. Items furnished by Miller, but manufactured by others, such as engines or trade accessories. These items are covered by the manufacturer's warranty, if any.
3. Equipment that has been modified by any party other than Miller, or equipment that has been improperly installed, improperly operated or misused based upon industry standards, or equipment which has not had reasonable and necessary maintenance, or equipment which has been used for operation outside of the specifications for the equipment.

MILLER PRODUCTS ARE INTENDED FOR COMMERCIAL AND INDUSTRIAL USERS TRAINED AND EXPERIENCED IN THE USE AND MAINTENANCE OF WELDING EQUIPMENT.

The exclusive remedies for warranty claims are, at Miller's option, either: (1) repair; or (2) replacement; or, if approved in writing by Miller, (3) the pre-approved cost of repair or replacement at an authorized Miller service station; or (4) payment of or credit for the purchase price (less reasonable depreciation based upon use). Products may not be returned without Miller's written approval. Return shipment shall be at customer's risk and expense.

The above remedies are F.O.B. Appleton, WI, or Miller's authorized service facility. Transportation and freight are the customer's responsibility. TO THE EXTENT PERMITTED BY LAW, THE REMEDIES HEREIN ARE THE SOLE AND EXCLUSIVE REMEDIES REGARDLESS OF THE LEGAL THEORY. IN NO EVENT SHALL MILLER BE LIABLE FOR DIRECT, INDIRECT, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES (INCLUDING LOSS OF PROFIT) REGARDLESS OF THE LEGAL THEORY. ANY WARRANTY NOT PROVIDED HEREIN AND ANY IMPLIED WARRANTY, GUARANTY, OR REPRESENTATION, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR PARTICULAR PURPOSE, ARE EXCLUDED AND DISCLAIMED BY MILLER.

Some US states do not allow limiting the duration of an implied warranty or the exclusion of certain damages, so the above limitations may not apply to you. This warranty provides specific legal rights, and other rights may be available depending on your state. In Canada, some provinces provide additional warranties or remedies, and to the extent the law prohibits their waiver, the limitations set out above may not apply. This Limited Warranty provides specific legal rights, and other rights may be available, but may vary by province.

Extranet <https://partners.itw welds.com>

The Distributor Extranet, located at <https://partners.itw welds.com>, is a secure, private website that offers personalized information to Miller distributors. It gives distributors the ability to check order status, track shipments, or check price and availability, whenever it is convenient — 24 hours a day, 7 days a week. It also provides access to product Specification Sheets, new product information, and gives you the ability to order Spec Sheets and sales tools online.

Because much of what you'll find at this site applies specifically to your company, a username and password are required to gain access. Controlled access to this information is very important for Miller and the distributor, which is why a formal "enrollment process" is required.

On-Line Enrollment Process

Distributor management visit <https://partners.itw welds.com> and click on "Register now," and you will be able to establish a Web Access Coordinator (WAC) for your business. When approved, the WAC will have the ability to enable access for all other employees within the distributorship that you wish to have access.

On-Line Service Parts Ordering

Once you're business is enrolled on the Extranet, you'll have the added convenience of placing your Miller Service Parts orders online. Contact your Web Access Coordinator to enable this feature. Then you'll be able to link to it from the "Sales Navigation."
